28046 Madrid

As a Project Manager, I have worked with many subcontractors. I consider Mobile Reality Company one of the best subcontractors in the IT sector I have cooperated. They exemplify quality, craftsmanship and professional ethics desired in a subcontractor.

I have the pleasure of working with the Mobile Reality Company on a project which purpose is creating the mobile equivalent of our custom SharePoint web platform for presenting Tableau Dashboards. Their performance is outstanding in the areas of software development, Tableau Software, management, communication, professionalism, and completion. Every task was performed on time and with attention to detail. The Mobile Reality Team was committed to rectifying any concerns and did so promptly. CBRE BDC mobile application was and is a demanding project, which requires integration with our infrastructures like ADFS, Tableau Server, and SharePoint.

The first phase was completed successfully at the beginning of June this year. Mobile application on iPad has met with a good reception and a positive opinion of directors in our organization. My team and I thank Mobile Reality Company for their commitment. Currently, we are under development of the second phase of the project, which includes customization application to iPhone devices and adding new features to the mobile application.

I recommend them to anyone who needs a reliable contractor that performs quality work with integrity.

Sincerely,

Victor Tomas Perez
