10418047

Business relationship with Mobile Reality Sp. z o.o. focused on creating brand new product genuinely tailored to my business vision was a comfortable and satisfying experience.

My goal, which was to develop the web application and native Android and iOS application that allows users to seek advice and feedback quickly by sharing two photos for others to vote on has been fast and fully achieved thanks to their useful ideas, inventive suggestions and extensive experience in following areas:

- UI and graphics designing services,
- mobile software development services,
- web software development services

Mobile Reality company is a valuable partner to work with for any company in search of professionals with vast expertise in the development and will to face new challenges while creating products for their clients.

Sincerely,
Adam Klimecki CEO,
Letempick LTD.
